Kulankendi Multiclient 1 credit

Kulankendi Multiclient 1 credit is a server-client application which allows you to unlock many different phones and PCMCIA modem cards without buying an expensive software and hardware.
To unlock phones you just need an original USB cable which you received with phone.
To start unlocking you should purchase KulanKendi Multiclient credits and quantity depends on model you want to unlock.
After purchase we will create account on server, send you login, password and direct link to download Kulankendi Multiclient.

GSM-SUPPORT has direct authorization from producer to sell this software.
Below we present full table of supported devices - please check how many credits you should purchase.
